## **Press release from PalMed France:**

Our third medical mission in two months in the Gaza region is coming to a close after two weeks of intervention at the European Hospital in Khan Younes.

This mission, led by a team from PalMed France, consisted of a vascular surgeon and a French operating room nurse, accompanied by fifteen practitioners from various medical and surgical specialties dispatched by PalMed Europe alongside our Palestinian colleagues.

Our team has cared for numerous seriously injured and ill patients, thus demonstrating PalMed's continued commitment to the local population.

In addition to essential medical care, we have provided crucial material support, including medical equipment and vital medications such as anesthetics, pain relievers, and antibiotics.

However, the devastation caused by the relentless bombardments is evident: 31 hospitals out of service, including 13 completely destroyed, testify to the extent of the humanitarian crisis in the region.

Faced with this alarming reality, PalMed France remains determined to support the local population and relieve our colleagues exhausted by five months of ceaseless work by sending regular medical missions.

We, doctors of PalMed, call on the international community to act decisively in favor of an immediate and sustainable ceasefire to end this spiral of violence.

We, PalMed doctors, appeal to the French and European authorities to facilitate our medical missions on the ground, so that we can continue to provide vital assistance in this crisis-ridden region.

PALMED, maison des associations, 5 bis rue du Louvre 75001 PARIS
